PUERTO RICO FLY-IN

Private Aviation Guide

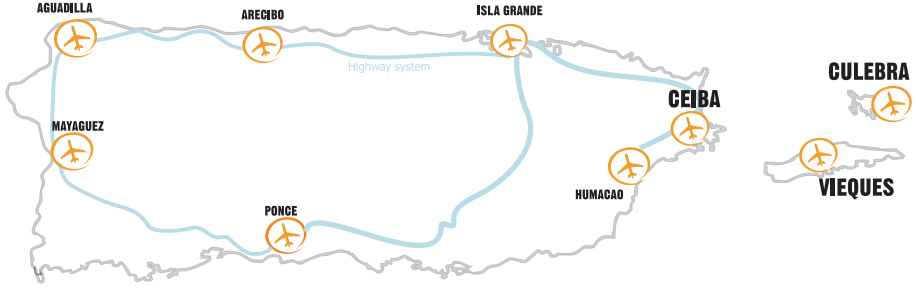
COMMONWEALTH OF PUERTO RICO

PUERTO RICO PORTS AUTHORITY

Puerto Rico Airport System

The Puerto Rico Ports Authority (PRPA) owns and operates 9 airports in the Commonwealth of Puerto Rico to promote the safe and efficient transportation of people and goods by air.

These airports support ongoing economic development, promote the island's tourism industry and conveniently link the Commonwealth's citizens to important destinations around the world.



Climate

The climate of Puerto Rico falls into the tropical climatic zone. Temperatures are moderate year round, averaging near 80 °F (27 °C) in lower elevations and 70 °F (21 °C) in the mountains. Easterly trade winds pass across the island year round. Puerto Rico has a rainy season which stretches from April into November. The mountains of the Cordillera Central are the main cause of the variations in the temperature and rainfall that occur over very short distances. The mountains can also cause wide variation in local wind speed and direction due to their sheltering and channeling effects adding to the climatic variation.

Before You Go

Departing the US

- International Flight Plan
- Charts – enroute low altitude L5
- Approved life vests
- Raft recommended, not required
- U.S. Customs' User Fee Decal
- 406 ELT – NOT required
- Pilot and aircraft documents
- No passport required.

Arriving in Puerto Rico

Non-stop from U.S.: land at any airport – no customs, no passport

International Flights/with fuel stop in International Territories:
- eAPIS and phone notification
- Land at a Customs airport
- One Customs form per family

US Customs entry requirements apply

Returning

Non stop to US
- USDA Aphis Inspection Required
- International Flight Plan

International Flights/with fuel stop in international territories:
- eAPIS and phone notification
- US Customs entry requirements

FAQ's
Frequently Asked Questions

Where is it?
940 nm from Miami; fuel stop in the Bahamas; 7.5 hrs. total flying time@ 130kt. No problem for a C172.

Over water?
Within gliding distance of land 90% of the time

Fuel?
Plenty of fuel enroute; range is not an issue
Available at 5 airports; cheapest fuel in the Caribbean; better prices than Florida and the US Virgin Islands.

Customs?
Non-stop from Miami – no Customs
Fuel stop in the Bahamas – eAPIS, notify customs, standard Customs form one per family – easy

406 ELT?
Not required for U.S. registered private aircraft

ATC?
Coverage all the way; you are with Miami/San Juan center most of the time

Night Flying?
All airports equipped for night time domestic arrivals/departures (24hrs operations)

Same procedures as the U.S.

USDA-APHIS inspections

VFR Transitions

Through the San Juan Class C Airspace

TANGO TRANSITION

Purpose: Westbound Transition through the San Juan Class C airspace.

Altitude: Maintain 2,000 feet MSL. Maintain VFR.

Frequency: San Juan Approach 120.9/290.2.

Procedures: Contact San Juan Approach at Fajardo/Luquillo.

Route Description:

From the vicinity of the Fajardo Lighthouse/Luquillo Condominiums proceed to the Plaza Carolina Mall. From overhead the Plaza Carolina Mall, continue directly overhead the Luis Muñoz Marín International Air Traffic Control Tower. Depart the tower on a heading 330 degrees until reaching the reef, approximately 2.0 miles offshore then enter left traffic for SIGT. When the Isla Grande Tower is closed, continue heading 330 degrees until the reef before proceeding westbound. From this point, you may enter into the Isla Grande traffic pattern or if continuing westbound, request additional advisories from San Juan Approach Control on frequencies 119.4 or 269.2.

RIVER TRANSITION

Purpose: Eastbound transition through the San Juan Class C airspace for: Isla Grande departures. >Overflying traffic from the West.

Altitude: Maintain 1,500 feet MSL. Maintain VFR.

Frequency: San Juan Approach 119.4/269.2 (Overflights only).

Route Description:

From abeam the La Plata (Dorado) River mouth, and approximately one mile offshore, proceed along the shoreline until north of the Condado Plaza Hotel. Then, continue directly overhead the Luis Muñoz Marín International Air Traffic Control Tower. From overhead the tower, continue eastbound between the runways on heading 095 degrees until advised by ATC.

Isla Grande Departures:

(a) Runway 9.

Climb to 1,500 feet and initially fly heading 070 degrees until crossing the shoreline, then continue eastbound directly overhead the Luis Muñoz Marín International Air Traffic Control Tower and join the "River Transition."

(b) Runway 27.

Climb to 1,500 feet while making a right downwind departure until north of the Condado Plaza Hotel, then continue directly overhead the Luis Muñoz Marín International Air Traffic Control Tower and join the "River Transition."

Pilots desiring to use this procedure should request the "River Transition" from the Isla Grande Ground Control. When departing the Isla Grande Airport and the control tower is not open, remain clear of the San Juan Class C airspace, contact San Juan Approach Control on 119.4/269.2, and request the "River Transition."

Overflights: Contact San Juan Approach on 119.4/269.2 in the vicinity of the La Plata (Dorado) River mouth with the request to join the "River Transition."

During unusual air traffic activity such as a west departure operation in San Juan, or marginal VFR weather conditions, these procedures may be curtailed and/or modified. Aircraft shall comply with the ATC instructions and plan an alternate route. The requirement for an operating Mode "C" transponder in the Class C airspace still applies.

LOW OFF SHORE

Purpose: Eastbound transition along the shoreline for helicopters and fixed wing aircraft.

Altitude: Maintain at or below 500 feet MSL

Frequency: San Juan Approach 119.4

Route Description:

Isla Grande Tower will direct departures off Isla Grande runway 9 or 27 to proceed eastbound along the northern shoreline at or below 500 feet and to contact Luis Muñoz Marín (SJU) Tower for further instructions.

PLAZA TRANSITION

An official description of the Plaza Transition is being revised and unavailable at this time. Isla Grande (SIG) Tower and Luis Muñoz Marín (SJU) Tower will give instructions as needed.

SAN JUAN/ISLA GRANDE - TJIG (SIG)

Fernando L. Ribas Dominicci

Commonly known as Isla Grande Airport, this is a small facility in Miramar, a district in the municipality of San Juan. It's convenient location within the convention center makes Isla Grande Airport an important part of the Puerto Rico Convention District, highlighting its centrality to the corporate and elite markets.

Role General Aviation, commercial and charter regional pasenger flilghts, regional cargo, Convention District support, aviation schools, aircraft maintenance.

Coordinates 18°27'N - 66°05'W **AOE**
